

SAP Solution for Specialty Chemical Producers and Distributors

Dell Services combines proven experience with SAP technology to help chemical providers improve inventory management, compliance, and process efficiency while reducing costs and improving profitability with an SAP solution based on chemical industry best practices.

To run a successful specialty chemicals business, executive management must have timely and accurate access to comprehensive Business Intelligence (BI). The ability to make decisions based on real-time information is vital to achieving higher margins and meeting customer needs. For producers and distributors who have grown through acquisition or maintained multiple sets of business processes and reporting approaches, the continuing use of different financial, procurement, and supply chain systems can make enterprise-wide visibility and management difficult – if not impossible.

Get a solution tailored to your business needs

Based on lessons learned from years of developing and implementing ERP solutions for industry-leading manufacturers and distributors, and in close collaboration with SAP, Dell Services has successfully implemented SAP software solutions at numerous U.S. chemical companies both large and small. Through this experience and our work with SAP, we have developed a proven approach that makes implementations highly predictable while providing the high degree of customization that chemical businesses require.

Enjoy predictable results at a predictable price

To enable specialty chemical companies to reap the benefits of an SAP solution as quickly and easily as possible, Dell Services has developed a best practices-based solution based on SAP 6.0. The Dell Services SAP solution provides chemical producers an optional 24-week, fixed-cost base implementation that combines proven business processes, software, user role documentation, target metrics, target data templates, testing material, and training materials tailored to specific requirements of the chemicals industry. Dell Services can also provide additional customization based on specific customer needs.

Our base Dell Services SAP solution provides a strong foundation of features and functionality to enable producers and distributors to take advantage of efficient industry best practices and processes, and enjoy greater control of extended supply chains, closer customer and supplier collaboration, more efficient inventory management, and greater visibility of key financial indicators and accountability processes.

To help deliver the results you expect, Dell Services has a fully staffed, experienced SAP chemicals team that includes seasoned process consultants, architects, and technologists. Combined with our proven onshore and offshore applications and infrastructure solutions teams, Dell Services has a full range of capabilities to help your business achieve success.

At A Glance

Working with SAP, Dell Services has developed best practices-based industry solutions that leverage the mySAP software specifically for chemical producers, enabling fast, easy, and cost-effective implementation of the SAP industry-leading ERP solution.

Dell Services SAP Solution for Chemical Producers includes:

- Fixed Cost Implementation Option
- Predictable Timeline with a 24-week Base Implementation Model
