

Oracle® Solutions for the Travel and Transportation Industry

At a Glance

Through deep industry and technical expertise, an array of interrelated services, and cost-effective global delivery, Perot Systems provides IT solutions and applications services to help businesses in the travel, transportation, and logistics industries transform and grow. Leveraging a worldwide network of skilled associates and state-of-the-art delivery centers, plus the experience acquired during thousands of successful engagements across multiple industry segments, we provide solutions that integrate strategy, technology, and processes to address critical business challenges in the most efficient manner. Whether integrating supply chains, developing and enhancing online reservation systems, migrating legacy applications, or automating other mission-critical e-business applications, Perot Systems can help you overcome your IT challenges quickly, cost-effectively, and with best-in-class quality.

GAIN THE SPEED, EFFICIENCY, AND FLEXIBILITY TO SEIZE COMPETITIVE ADVANTAGE IN A FAST-CHANGING GLOBAL MARKETPLACE.

Perot Systems is a Certified Advantage Partner of Oracle delivering real world solutions for the Travel and Transportation industry, including specializations in legacy supply chain management, logistics applications, and systems integration. Perot Systems has the experience and knowledge necessary to combine operational, financial, and human capital information to provide key financial users the information necessary to make vital business decisions.

Leveraging Financial and Human Capital Management applications from Oracle, Perot Systems provides solutions for integrating strategy, technology, and processes to quickly address business challenges and help drive bottom-line results.

Through industry-specific expertise, tightly integrated services, a client-focused collaborative approach, and a flexible, cost-effective global delivery model, Perot Systems can help your organization prepare for, implement, and manage Oracle solutions that achieve measurable results and maximum return on investment.

EXPERTISE.

Perot Systems has built a global team of associates with expertise in Oracle applications who have guided successful implementations for customers in the Travel and Transportation industry. We help customers maximize the benefits and value of Oracle solutions, from high-level strategic consulting to productivity-enhancing applications services, supporting infrastructure services, and cost-effective business process solutions. Many of these clients become our company's strongest advocates by providing referrals to other organizations.

MAXIMIZE YOUR HUMAN RESOURCES.

Perot Systems understands the challenges of effectively managing your workforce. Given group diversity, ever-changing rules and regulations, and high turnover costs, it is crucial to understand how best to manage and maintain your important human capital assets.

Our application solutions allow managers to oversee the processes without being involved in multiple, disparate platforms. In an industry where customer demands must be met quickly and with the highest priority, it is paramount that systems require minimum input and provide maximum controls and audits.

CREATING COHESION IN YOUR OPERATIONS.

Most organizations have only a glimpse into their daily operations. Perot Systems can help consolidate operational reporting into one coherent design for decision-makers. This gives management the tools they need to effectively optimize their workforce, quickly identify potential risk factors such as safety violations, and catch data integrity issues before they impact other areas of business.

We understand that Travel and Transportation organizations rely heavily on legacy supply chain, logistics, and reservation/booking systems. Integrating data across these applications and within the ERP platform requires a technology service provider with experience in the business processes and data requirements inherent in the industry.

OPTIMIZING FINANCIAL MANAGEMENT.

Your financial management system is a source of strategic value. Perot Systems can help establish the internal controls, risk mitigation, and emphasis on governance that Travel and Transportation companies need to have greater insight into their financial performance and react more efficiently to competitive threats.

PEROT SYSTEMS CAN HELP YOU DESIGN, IMPLEMENT, AND MANAGE YOUR ENTERPRISE-WIDE ORACLE APPLICATION IMPLEMENTATION. OUR EXPERIENCE AS A LEADING TECHNOLOGY AND SYSTEMS INTEGRATOR MEANS YOU GET THE RESULTS YOU NEED AT A PREDICTABLE PRICE.
