

Healthcare Operational Continuity Disaster Recovery Preparation for the MEDITECH Community

Healthcare providers have become dependent upon technology to provide patient care. Now more than ever, the clinical and business risks in the absence of an adequate business continuity, or Healthcare Operational Continuity, plan are too great to ignore.

Utilizing our intimate understanding of MEDITECH, the MEDITECH Solutions Group has developed Best Practices for MEDITECH Healthcare Operational Continuity. Our technology and application consulting services combine to provide a full range of business continuity offerings from assessment and planning, through implementation and testing. We tailor our services to leverage your resources and provide expertise where they can best be utilized.

Our Healthcare Operational Continuity services include:

Healthcare Operational Continuity Assessment

- Evaluate and inventory systems, software, & network (MEDITECH & non-MEDITECH)
- Prioritize applications to be recovered
- Define methodology necessary to perform backup sequence and recovery
- Determine the Recovery Point and Recovery Time Objectives for systems
- Identify variable recovery plan options and budgetary considerations
- Present and document options, risks, and benefits of alternative recovery strategies (high level)

MEDITECH Disaster Recovery Plan Design and Development

- Analyze departments to identify and document application & workflow processes
- Assess MEDITECH and third-party hardware requirements
- Assess network capacity and requirements
- Assess system, storage, and back-up requirements
- Develop implementation plan outlining main data center, enterprise back-up solution, MEDITECH serverless back-up, and business continuity center
- Define disaster recovery, test, and support plan requirements

Implementation Services

- Procure and test hardware design for customer-owned and managed disaster recovery
- Refine and manage implementation plan
- Define and perform initial test of the recovery procedure
- Provide initial documentation of recovery procedure
- Provide customer staff training and training documentation

*MAGIC & Client/Server
Expertise*

Achieve the
power of
MEDITECH

Ongoing Support, Testing, and Recovery Services

- Test and update procedures
- Provide tier-one support of infrastructure (systems, SAN, connectivity equipment)
- Provide emergency response team in case of actual declared disaster

Managed Disaster Recovery Services (JSite)

- Outsource your MEDITECH disaster recovery to the MEDITECH Solutions Group within Perot Systems, a preferred MEDITECH provider
- State-of-the-art infrastructure and fault-tolerant facilities
- Skilled, trusted technologists with over 20 years experience working with MEDITECH
- Your data restored and online in 4-12 hours of disaster declaration and tape receipt
- Remote and on-site Disaster Recovery Support Services
