

Integrated Healthcare Delivery Solutions for the MEDITECH Community

The MEDITECH Solutions Group within Perot Systems develops and delivers integrated IT solutions that empower healthcare organizations using the MEDITECH Health Care Information System (HCIS) to optimize healthcare delivery. Leveraging our in-depth technology and application consulting experience, we offer comprehensive solutions that integrate your people, processes, and technology to ensure you realize the full potential of your MEDITECH system. A partnership with the MEDITECH Solutions Group brings with it an experienced team of healthcare consultants and technology experts dedicated to helping you achieve your strategic goals.

Optimized Healthcare Delivery

As your MEDITECH solutions partner, we work with you to gain a full understanding of your short-term objectives and long-term strategic goals, then design and implement a solution that meets your specific criteria. We have helped MEDITECH organizations around the world to improve patient care, reduce expenses, enhance revenue, and to realize their goals in other strategic areas such as patient safety, provider satisfaction, and market differentiation.

Integrating People, Process, and Technology—Our Proven Formula for Success

Our proven methodology is based on integrating the three essential enablers to success: people, process, and technology. The alignment of these three components is critical to achieve your strategic goals.

Engaging your workforce

To affect real change in your organization, your people must be aligned with your goals and objectives. Working side-by-side with you and your employees, we will empower you with the training, knowledge, confidence, and vision you need to make the organizational changes necessary for success.

Transforming your processes

Transforming your clinical and business processes so they are most effectively aligned with your MEDITECH system is a critical step toward achieving your healthcare and operational objectives. Process redesign, aligned with the implementation or ongoing evolution of your MEDITECH system, can enhance patient safety and improve your organization's bottom line.

Enabling your technology

Your technology solutions must support your organization's strategic plan. We will help you develop a solution that balances reliability, performance, scalability, and cost while ensuring compatibility with your MEDITECH HCIS. We serve as your primary technology integrator, providing testing, certification, implementation, and project management to ensure a smooth transition to your staff.

Our Core Expertise

With experience gained in delivering IT solutions to over 1000 MEDITECH organizations, the MEDITECH Solutions Group within Perot Systems brings expertise in three important areas: MEDITECH, healthcare, and technology.

Achieve the power of MEDITECH

Combining Technology & Application Expertise to Deliver a Complete Solution

MEDITECH

With a singular focus on the MEDITECH community, the MEDITECH Solutions Group has cultivated deep MEDITECH relationships and is uniquely positioned to help you maximize the return on your MEDITECH investment. Many of our consultants are former employees of MEDITECH and MEDITECH hospitals.

Healthcare

With an average of 20 years healthcare experience, our consultants within the MEDITECH Solutions Group offer a real-world understanding of your needs and challenges. Our knowledgeable staff of former CIOs, RNs, pharmacy technicians, laboratory managers, and supply chain managers brings hands-on expertise in all aspects of MEDITECH's clinical, financial, and administrative applications and processes.

Technology

Our vast integration expertise has been gained from developing and testing certified technologies with MEDITECH and deploying them in hospitals worldwide. Our team of engineers has proven experience with systems, storage, backup, recovery, and enabling technology that allows us to design, test, and deliver the optimum IT solution for you.

Proven Healthcare Delivery Solutions

We customize solutions to meet organizational needs, budgets, and resource availability. We can help you engage your workforce, transform your processes, and enable your technology to achieve your goals.
