

Accelerating Your Oracle® Implementations

Oracle Business Accelerators:

- Guide the project scope using industry best-practice flows while configuring the Oracle E-Business Suite
- Minimize the risk of varying implementation skills by using highly-structured and prescribed methodologies
- Can often begin transaction testing in hours rather than days, weeks, or months
- Achieve low total cost of ownership for tested and robust best-practice business processes
- Preserve access to world-class Oracle support with a solution that is 100 percent Oracle E-Business Suite

Implement applications faster and at less cost with Accelerator Services from Perot Systems.

For many organizations, Information Technology makes their company more competitive and provides flexibility to respond to changes in the marketplace. However, many enterprises now require installing and maintaining applications with fewer people and at less cost.

The Perot Systems Accelerate approach is based on the Oracle Business Accelerator (OBA) solutions program. Our process enables implementation of the Oracle E-Business Suite quickly and with less risk. Speed-of-implementation equals speed-to-value, which positions your company to begin achieving more benefits sooner than with traditional ERP implementations which can take months to complete.

Defining the Perot Systems Accelerate approach

Our Accelerate methodologies use a comprehensive set of applications, tools, and proven techniques developed over multiple successful Oracle E-Business Suite implementations. Using the proven OBA solutions, Perot Systems provides scalable, industry-specific functionality. These accelerator solutions are available in pre-packaged, fixed-price, and fixed-scope application bundles.

Leveraging OBA process flows and scripts allows companies to leverage best implementation practices. OBA test plans and scripts to eliminate time-consuming activities and help anticipate future testing requirements.

Questionnaires prompt your team to identify Oracle-required set-up information. Based on assessing responses, we can help you define and plan business process improvements and the best Oracle application set-up. In many cases, a pilot environment can be ready for use in days instead of weeks or months. With a pilot in-place for testing and evaluation, the enterprise has hands-on use of the Oracle environment in time to more effectively understand how to better run their business.

The Perot Systems difference

As an Oracle Platinum Partner, we combine a deep skill set with the Oracle E-Business Suite along with vast implementation experience. Perot Systems is also a certified implementer of Oracle Business Accelerators. Our methodologies help bring project completions in on-time, within budget, and to the highest standards.

The Perot Systems track record for delivering exceptional service to private and public sector organizations has resulted in successful Oracle implementations for HR Management, Financials, Supply Chain, and Manufacturing projects. Our repeatable methodology for accelerated implementations, as well as our proprietary tools and templates, expedite the entire implementation process.

About Perot Systems

With more than 23,000 associates and 2008 revenues of \$2.8 billion, Perot Systems is a Fortune 1000 corporation. Drawing on deep industry experience and a portfolio of interrelated consulting, business process, application, and infrastructure services, we blend strategic design, proven technology, and timely delivery to create solutions that maximize returns on IT investments.
